| ASRO Regional<br>Programme<br>Evaluation (RPE) | 2024 | Arab States<br>Regional Office | Regional<br>Programme<br>Evaluatin<br>(RPE) | 2022-2025 | Strategic level<br>Focus | Enhance technical and operational support to COs:  - Conduct capacity assessments and roll out well-defined country-focused support plans.  - Promote a high level of consultation and participation of country office staff members at different levels in the development of the next regional programme, including its TOC.  - Strengthen the existing system of responding to country office's requests to ensure agility and timeliness.  - Regularize two-way regional exchanges and knowledge sharing between ASRO and COs convened by ASRO teams.  - Create synergies between strategic partnerships at regional and country levels   | Accepted                             | High            | Delivering a more     'country facing / country first regional office - in terms of engagements, workplanning, strategic planning and partnerships.   | 1.1 Conduct in-depth COs' consultation on ASRO 2025 Workplan;     1.2. Conduct COs' consultation as part of the new RPD Cycle; 1.3     Map, standardise and ensure effectiveness of all ASRO communities of practice; 1.4. Conduct mid-year review with COs of progress against the regional annual workplan and TOPS requests for course correction as necessary; 1.5 Further integrate results of regional strategic partnership with country level work (ensuring stronger two-way engagemnets)  |
|  |      |                                |   |           | Strategic level<br>Focus | Facilitate a more conducive environment for RM at regional and country level in all settings:  - Facilitate robust resource mobilisation and adaptive financing strategies at regional and country office levels. Track progress of the implementation of these strategies with specific timelines and measurable outcomes.  - Map and assess funding and financing (IFIs, private sector, and government financing) opportunities at the 3 TRs and outcome levels (in development and humanitarian settings)  - Co-formulate with regional teams and COs UNFPA's added value and create incentives for donors and financiers  - Engage with strategic partners and leverage their comparative advantage as entry points to facilitate the transition to funding and financing (e.g. WHO and Universal Health Coverage), including through joint programmes  - Regularly build capacities of RO and COs teams to mobilize resources, including innovative financing mechanisms. | Accepted                             | High            | Resource Mobilization (RM) and Partnership (P) architecture and strategic approach that is forward looking, predictable, and sustainable.   | 2.1 Design and implement under Regional level oversight Integrated RM and P Plans for new Country Programmes in place, targeting a well composed approach to RM that is predictable and sustainable; 2.2 Put in place a tracking system for co-financing targets set at Regional and Country levels in coordination with PFFB; 2.3 Conduct a mapping of priority untapped donor funding and financing opportunities, including IFIs and private sector and Foundations; 2.4 Develop advocacy materials and enhance dessimination with donors and partners for both developmental and humanitarian crises (eg. Situation Reports, humanitarian overviews Syria/Yemen, videos, infographics); 2.5 Leverage partnership with sister organizations for development of Joint Programmes and leveraging funding and financing including at the Regional level; currently formulating a migration proposal with Regional IOM/WHO-EMRO. |
|  |      |                                |   |           | Strategic level<br>Focus | Strengthen the timely recruitment, utilization and retention of UNFPA's workforce:  - Capitalize more on the use of rosters, especially for core UNFPA functions  - Locate and address the root causes of retention challenges and vacancy rates in ASRO and COs (e.g. office culture, flexible working arrangements, recognition and rewards, learning and development, career growth)  - Incorporate mentorship programs to retain talent and transfer knowledge within the organisation.  - ASRO to engage with headquarters on ways to reduce bottlenecks in recruitment process and expedite hiring.  - Develop a succession planning strategy to manage staff turnover effectively.   | Accepted                             | High            | Creation of skills     taxonomy in Arab States     Region and Roster of Pre- approved FTA and TA     staff for deployments in     'commonly' recruited     functions. Mentorship     programme pilot is     underway in AS region,     with 10 paired     mentors/mentees | 3.1. Lauch a rostering exercise for recurrent posts (i.e. GBV, SRH) with a view to be able to quickly address / deploy temporary and medium term staffing needs and keep the vacancy rate at 14%, 3.2 Monitor progress/lessons learned together with DHR on the mentorship programme across the region, 3.3 ASRO HRFPs have monthly standing meetings with Reps and HoOs / local HRFPs precisely to plan and manage turnover smoothly   |
