Malaysia Country Programme Evaluation (2022-2025)	2024	Malaysia CO	Country Programme Evaluation (CPE)	AP	2021-2025	1/1/21	5/30/24	1. Capitalize on the partnership base developed, expand it further by adopting a strategic approach to partnerships in the design and implementation of programmes, while coordinating with other partners with similar broad objectives, and mobilize more flexible funding.	1. Capitalize on the partnership base developed, expand it further by adopting a strategic approach to partnerships in the design and implementation of programmes, while coordinating with other partners with similar broad objectives, and mobilize more flexible funding.	Accepted	High	1.1 CO will do mapping of partners in SRH, GBV and PD at the national level and in UNFPA-targeted sub-national states. As part of this exercise, the mapping will also identify partners involved in financing initiatives, building on the private sector landscape in Malaysia mapping conducted by APRO.	1.1 CO will do mapping of partners in SRH, GBV and PD at the national level and in UNFPA-targeted sub-national states. As part of this exercise, the mapping will also identify partners involved in financing initiatives, building on the private sector landscape in Malaysia mapping conducted by APRO.	12/31/2026

Capitalize on the partnership base developed, expand it further by adopting a strategic approach to partnerships in the design and implementation of programmes, while coordinating with other partners with similar broad objectives, and mobilize more flexible funding.	Accepted	High	1.2 CO will engage with a broader range of CSOs and private sector partners to identify opportunity for innovative financing, build engagement and collaboration for country programmes implementation to enhance implementation of policies related to the 3 TRs into action at the sub-national level.	1.2 CO will engage with a broader range of CSOs and private sector partners to identify opportunity for innovative financing, build engagement and collaboration for country programmes implementation to enhance implementation of policies related to the 3 TRs into action at the sub-national level.	12/31/2026
Malaysia Country Programme Evaluation (2022-2025)	2024	Malaysia CO	Country Programme Evaluation (CPE)	AP	2021-2025	1/1/21	5/30/24	2. Institutionalize more systematic mechanisms for the effective management of the Country Programme, including forward planning, monitoring and reporting of results, and integrate sustainability in the design and implementation of interventions.	2. Institutionalize more systematic mechanisms for the effective management of the Country Programme, including forward planning, monitoring and reporting of results, and integrate sustainability in the design and implementation of interventions.	Accepted	High	2.1 CO will develop and implement standardized monitoring tools: Create easy-to-use, standardized monitoring tools that assess quality improvement and use identified program gaps/needs in future programming. The CO will strengthen capacity of implementing partners in M&E through training sessions and workshops, quality assurance of IP progress reports in quantumpus, developing AWP output indicators, baseline and targets, with increased emphasis on keeping the language more results-based and less process-based.	2.1 CO will develop and implement standardized monitoring tools: Create easy-to-use, standardized monitoring tools that assess quality improvement and use identified program gaps/needs in future programming. Malaysia Country Programme Evaluation (2022-2025)	2024	Malaysia CO	Country Programme Evaluation (CPE)	AP	2021-2025	1/1/21	5/30/24	4. UNFPA to advocate for and influence policies and financing (while building on evidence from studies), that investing in SRHR and AY and the prevention of GBV and harmful practices across the life course, through increased budgetary allocations, can yield significant returns in terms of improved health outcomes, gender equality and economic development.	4. UNFPA to advocate for and influence policies and financing (while building on evidence from studies), that investing in SRHR and AY and the prevention of GBV and harmful practices across the life course, through increased budgetary allocations, can yield significant returns in terms of improved health outcomes, gender equality and economic development.	Accepted	High	4.1 CPD2 will focus on i) generating commitment for inclusive and evidence-based national and sub-national comprehensive SRHR costed action plans that address the needs of vulnerable and marginalized population groups left furthest behind; ii) supporting national and sub-national partners to generate and use evidence to address issues related to, and to inform investments and policies on SRHR including adolescent pregnancy prevention, unmet need for family planning, gender equality, and prevention and response to GBV and harmful practices; iii) supporting national and sub-national partners to advocate for and monitor the implementation of youth-friendly SRH information and services and interventions addressing GBV including TFGBV and harmful practices; iv) facilitating the integration of a life cycle approach in the national Reproductive Health and Sexuality Education (PEERS) curriculum and broker technical support for its implementation and monitoring in- and out-of-schools, in higher learning institutions, and across lifelong learning programmes.  To support the achievement of these interventions, the CO will consolidate evidence and key findings from national and UNFPA-supported studies on SRHR, adolescents and youth (AY), and GBV, develop policy briefs and investment cases, engage stakeholders through strategic partnerships and advocacy, and convene high-level policy dialogues, roundtables, briefings, and public campaigns.	4.1 CPD2 will focus on i) generating commitment for inclusive and evidence-based national and sub-national comprehensive SRHR costed action plans that address the needs of vulnerable and marginalized population groups left furthest behind; ii) supporting national and sub-national partners to generate and use evidence to address issues related to, and to inform investments and policies on SRHR including adolescent pregnancy prevention, unmet need for family planning, gender equality, and prevention and response to GBV and harmful practices; iii) supporting national and sub-national partners to advocate for and monitor the implementation of youth-friendly SRH information and services and interventions addressing GBV including TFGBV and harmful practices; iv) facilitating the integration of a life cycle approach in the national Reproductive Health and Sexuality Education (PEERS) curriculum and broker technical support for its implementation and monitoring in- and out-of-schools, in higher learning institutions, and across lifelong learning programmes.
