Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster Strategic Recommendation 1	All four UNFPA programmes should focus on fewer outputs that are focused on interventions within UNFPA's core mandates in order to get efficiency gains. It is recommended that UNFPA programmes in the four countries/territory focus primarily on two areas: SRHR and PD, both of which are well within UNFPA traditional mandate and do not overlap with other UN agencies. These two programme focus categories should be kept narrow in focus but can address specific target groups and focus areas, such as youth, marginalized populations, and women victims of GBV. Continued work on PD policy making and monitoring, with a focus on data, are extremely important and therefore recommended as a priority for all four countries/territory.	Accepted	High	CPD Development	CO BiH will focus on SRHR and PD at the time of next CPD development.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster SRH Recommendation 1	All four countries/territory should continue and expand to work on family planning service delivery, including advocacy for MOH support for contraceptive procurement, to reduce unmet need and reliance on abortions for unplanned pregnancy.	Accepted	High	Family Planning	CO BiH will continue organisation of family planning trainings for family physicians with special focus on Youth Friendly Approaches.	12/31/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster SRH Recommendation 2	UNFPA programmes in all four countries/territory should adjust interventions to the needs of specific population groups, including marginalized and vulnerable groups (Roma, people with disabilities and young adolescent girls) and develop tailor-made interventions for these groups.	Partially accepted	High	Vulnerable Groups	CO BiH mostly focuses on health policy development that equally treat all population groups in line with health insurance they have (therefore little change is feasible). However, the family planning initiatives will focus on Youth Friendly Approaches that will provide more support to younger generations, with particular focus on vulnerable groups.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster SRH Recommendation 3	The UNFPA programmes in all four countries/territory should focus on developing and supporting an economical approach for cervical cancer screening and treatment that can be gradually expanded to serve all parts of each country/territory.	Partially accepted	Medium	Vaccination	Cost of cancer screenings is too high so health care authorities cannot provide such services without substantial external financial support. Instead, CO BiH will work on raising awareness and introduction of HPV vaccines in order to prevent cancers in young people. Also, CO BiH will work on promotion of use of condoms as a tool for prevention of STIs.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster SRH Recommendation 4	In all four countries/territory, UNFPA should continue to support work related to maternal health, and in particular work on maternal mortality and morbidity surveillance.	Rejected	Low	Maternal Mortality and Morbidity Surveillance	CO BiH will continue cooperation with EEIHR from Romania and EECA RO on development of OSRS platform for continuous maternal mortality and morbidity surveillance. It is expected this initiative to be finalised in current CPD period and not continued in the next CPD period.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster SRH Recommendation 5	In all four countries/territory, UNFPA should continue to support work related to MISP to ensure that it is fully functional in time of need within each country's response system for health emergencies.	Accepted	Medium	Disaster Risk Reduction	CO BiH will continue cooperation with other UN agencies in the country on development of localised disaster risk reduction plans and embedding of MISP in those plans (including capacity building of relevant local stakeholders for provision of MISP, including CMR).	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster Youth and Adolescence Recommendation 1	In all four countries/territory UNFPA programmes should support efforts to work within public primary and high schools to support the development of effective CSE curricula and training of appropriate types and quantity of teachers for expansion of CSE in cooperation with national educational systems. These efforts may require additional expertise from the Regional Office to assist the COs on a short-term basis to support advocacy, policy dialogue and technical assistance with the pertinent Government agencies.	Accepted	High	CSE	CO BiH will continue advocating for Healthy Lifestyles curricula to be included in regular teaching curricula in primary schools across the country.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster Youth and Adolescence Recommendation 2	In all four countries/territory, UNFPA should consider implementing programmes that address SRH, gender stereotypes and GBV among young men and scale up these programmes as much as feasible. There should be a regional review of male oriented programme initiatives within the four nations in order to develop a four-nation collaboration effort. Each of the four countries should develop male oriented program efforts that are narrowly focused and provide the best opportunity to capitalize on prior local and regional experience.	Accepted	Medium	Gender Equality	CO BiH will focus on work with young people in the next programme cycles. As part of the youth initiatives, raising awareness activities will be planned aimed at addressing SRH, gender stereotypes and GBV.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Cluster Youth and Adolescence Recommendation 3	Develop or assist government institutions and NGO organizations to develop and maintain a mobile phone application for SRHR is important step that has potential to achieve the intended impact if widely used by young people. UNFPA should consider developing and implementing applications for mobile devices for young people.	Partially accepted	Medium	SRHR Mobile Platforms	CO BiH has already provided support to government and non-government partners for development of mobile SRHR platforms. In the future, CO BiH will only continue providing support for maintenance and updating of those platforms.	12/30/20

Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	GE and GBV Recommendation 1	UNFPA programmes in all four countries/territory should remain active in the field of GE and GBV and continue supporting capacity building of health professionals throughout their respective countries/territory. GE and GBV activities should be discontinued as a separate initiative; they should be continued as part of upgrading the capacities of health professionals through future UNFPA supported SRH initiatives.	Partially accepted	Medium	Disaster Risk Reduction	CO BiH will implement a DRR programme jointly with other UN agencies. As part of this programme, CO will organise trainings on MSP and CMR that will cover the perspective of GE and GBV. Also, future youth projects will be focused on empowerment of girls and transformation of gender roles in selected communities.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Population and Development Recommendation 1	In all four countries/territory the UNFPA programme should continue to extend advisory support to the national partners, notably the national agencies responsible for statistics, to enhance knowledge and the instruments for collection and dissemination of data relevant for improved national population statistics.	Accepted	High	NSOs	CO BiH will continue building capacities of statistical offices for collection and analysis of statistical data.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Population and Development Recommendation 2	UNFPA programmes in each country/territory need to support and participate in the MICS activities (or in the case of BiH, consider providing support for a DHS or other type of survey) as much as feasible to ensure the key demographic data are collected for UNFPA programme development and monitoring.	Partially accepted	High	DHS/MICS	CO BiH will continue cooperation with other UN agencies and statistical offices on fundraising and implementation of key demographic and health surveys.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Strategic Recommendation 1	1.1 UNFPA should consider streamlining its work into two programme areas to capitalize on its core mandates and biggest added values as recognized by stakeholders, while ensuring focus on selected target groups in line with the UNFPA Strategic Plan and local needs.	Accepted	High	CPD Development	CO BiH will focus on SRHR and PD at the time of next CPD development.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Strategic Recommendation 1	1.2 The UNFPA needs to coordinate its programmatic actions with UN agencies and other partners (including EU, bilateral donors and their implementing partners) in order to avoid duplication and overlap. UNFPA should keep and regularly update a comprehensive stakeholder register with identified interests and influence of each stakeholder in order to foster partnerships and ensure regular processes of stakeholder management, including required communication and engagement.	Accepted	High	Resource Mobilization, Partnership and Advocacy Plans	CO BiH will develop updated resource mobilization, partnership and advocacy plans as part of the new CPD	4/30/21
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Strategic Recommendation 1	1.3 UNFPA should continue the practice of integrating internationally developed methodologies in BiH.	Accepted	High	International Methodologies	CO BiH will continue integrating internationally developed methodologies in line with previous practices.	4/30/21
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Strategic Recommendation 2	2.1 UNFPA should decide which interventions have the biggest potential for long-term development, introducing systemic solutions, which are feasible and could have the necessary buy in from domestic partners, and pursue these interventions.	Accepted	High	CPD Development	CO BiH will focus on SRHR and PD at the time of next CPD development.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Strategic Recommendation 2	2.2 Sufficient time and resources need to be invested in monitoring and reporting on implementation of plans.	Accepted	High	M&E Plan	CO BiH will develop M&E plan as part of the new CPD	4/30/21
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Strategic Recommendation 2	2.3 The practice of drafting and monitoring resource mobilization, partnership and advocacy plans should be upheld and improved with a view of increasing effectiveness.	Accepted	High	Resource Mobilization, Partnership and Advocacy Plans	CO BiH will develop updated resource mobilization, partnership and advocacy plans as part of the new CPD	4/30/21
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 1	UNFPA should continue to work on family planning in order to reduce the number of abortions and unmet need.	Accepted	Medium	Family Planning	CO BiH will continue organisation of family planning trainings for family physicians with special focus on Youth Friendly Approaches.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 2	UNFPA should continue work on introduction of breast, cervical and prostate cancer screening.	Partially accepted	Medium	Vaccination	Cost of cancer screenings is too high so health care authorities cannot provide such services without substantial external financial support. Instead, CO BiH will work on raising awareness and introduction of HPV vaccines in order to prevent cancers in young people. Also, CO BiH will work on promotion of use of condoms as a tool for prevention of STIs.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 3	UNFPA should adjust its interventions to the needs of specific groups of population, including marginalized and vulnerable groups and develop tailor-made interventions for these groups.	Partially accepted	High	Vulnerable Groups	CO BiH mostly focuses on health policy development that equally treat all population groups in line with health insurance they have (therefore little change is feasible). However, the family planning initiatives will focus on Youth Friendly Approaches that will provide more support to younger generations.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 4	UNFPA should continue to work on maternal mortality and morbidity surveillance.	Partially accepted	Low	Maternal Mortality and Morbidity Surveillance	CO BiH will continue cooperation with EERI from Romania and EECA RO on development of OSRS platform for continuous maternal mortality and morbidity surveillance. It is expected this initiative to be finalised in current CPD period and not continued in the next CPD period.	12/30/20

Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 5	UNFPA should continue to work on the integration of MISP into health sector's response to emergencies, and the prevention and response to GBV in emergencies.	Partially accepted	Medium	Disaster Risk Reduction	CO BiH will continue cooperation with other UN agencies in the country on development of localised disaster risk reduction plans and embedding of MISP in those plans (including capacity building of relevant local stakeholders for provision of MISP, including CMR).	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 6	UNFPA should continue to work on embedding CSE in the school curricula in FBiH and RS.	Accepted	High	CSE	CO BiH will continue advocating for Healthy Lifestyles curricula to be included in regular teaching curricula in primary schools across the country.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 7	UNFPA should help relevant institutions implement priorities related to sexuality education and SRHR services from FBiH and RS strategic documents for improvement of sexual and reproductive health and rights.	Accepted	High	Family Planning	CO BiH will continue organisation of family planning trainings for family physicians with special focus on Youth Friendly Approaches.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 8	UNFPA should focus on the empowerment of girls and transformation of gender roles.	Accepted	High	Youth	Future youth projects will be focused on empowerment of girls and transformation of gender roles in selected communities.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 9	UNFPA should embed GBV and CRSV response training into training programmes for health professionals and monitor the application of these procedures in a manner agreed with the FBiH Ministry of Health and the RS Ministry of Health and Social Welfare, given their preferred approach to GBV victims.	Accepted	Medium	Disaster Risk Reduction	CO BiH will implement a DRR programme jointly with other UN agencies. As part of this programme, CO will organise trainings on MSP and CMR that will cover the perspective of GE and GBV.	12/30/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 11	UNFPA should contribute to better population data collection.	Accepted	Medium	DHS/MICS	CO BiH will continue cooperation with other UN agencies and statistical offices on fundraising and implementation of key demographic and health surveys.	12/31/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 12	UNFPA should invest targeted effort in surveying the magnitude and reasons for youth emigration and assist domestic authorities in creating evidence-based policies.	Partially accepted	High	Population Policies	Database on migrations in BiH has been developed with the support of UNFPA in previous CPD period but has never been put in use by the Ministry of Security due to complex administrative arrangement in the country and sensitivity of such data. Instead, CO BiH will advocate and build capacities of government authorities for development of population policies.	12/31/20
Bosnia and Herzegovina Country Programme Evaluation (2013-2018)	2019	Bosnia and Herzegovina CO	Cluster Programme Evaluation (CPE)	EECA	2013-2018	1/1/15	5/30/16	Programme Recommendation 13	UNFPA should support monitoring of policies for SRH, youth and ageing and advocate further drafting of comprehensive population policies.	Accepted	Low	Population Policies	CO BiH will advocate for development of M&E plans as part of each population policy developed in the country.	12/31/20
