Gap mapping/analysis of relevant evaluative evidence and knowledge gaps that are strategically important to inform the design and implementation of the upcoming country programme	A country programme evaluation was not conducted during the 4th programme cycle. The development of the new country programme (CP) has been informed by a thorough analysis of evaluative evidence available at centralized, regional and country levels, covering programming in the areas of sexual and reproductive health, gender-based violence, and demographic resilience. The costed evaluation plan has been developed based on the mapping document, which highlights data gaps related to the outputs of the new CP and informs the country office's strategy to address these gaps through diverse evaluation processes during the 5th CP cycle.
