

Costed Evaluation Plan Turkmenistan Country Office

Programme Cycle	United Nations Population Fund (UNFPA) Turkmenistan 6th Country Programme (2026-2030)
Indicative Budget	US\$ 6.21 million
Country programme priority areas (outputs)	<ul style="list-style-type: none"> ● Output 1: By 2030 formulated and implemented inclusive, rights-based gender-sensitive legislation, social protection and accountability frameworks enable universal access to sexual and reproductive health and rights, and prevention and response to gender-based violence. ● Output 2: By 2030, strengthened capacities of communities and institutions to address discriminatory gender and social norms to advance gender equality, reproductive rights, and equitable access to quality GBV services and social protection systems. ● Output 3: By 2030, strengthened data systems and evidence factor population changes and other megatrends including climate change to inform the development and implementation of policies, programmes and financing on demographic resilience, gender equality and sexual and reproductive health and rights.
Previous country programme evaluation	<p>Period covered: 4th Country Programme (2016-2020)</p> <p>Year of completion: 2019</p> <p>Evaluation quality assessment rating: Good</p>
Gap mapping/analysis of relevant evaluative evidence and knowledge gaps that are strategically important to inform the design and implementation of the upcoming country programme	<p>The 6th country programme (CP) for Turkmenistan (2026-2030) is informed by evaluative evidence drawn from UNFPA and other evaluations conducted at country, regional and global level, including the recent United Nations Sustainable Development Cooperation Framework (UNSDCF) evaluation (2021-2025), and the evaluation report of the Regional Programme for Eastern Europe and Central Asia (2022-2025). The evaluative evidence analysis reveals knowledge gaps in evidence related to emergency preparedness and response with regards to sexual and reproductive health (SRH) and gender-based violence (GBV) and also across all three CP outputs, which will be narrowed further through the planned evaluation of the 6th CP, scheduled for 2029 in accordance with UNFPA's evaluation policy. Despite the UNFPA support within the last three programme cycles, approaches and strategies in the area of GBV are not effective based on the evidence that justification of violence is constantly going up, the legislation does not exist, and services are limited in the scope and quality. More tailored and effective partnerships are needed to modify social norms and develop the legislative framework and launch the services for survivors. Knowledge management, policy advisory support and technical expertise were crucial in significant reduction of the maternal mortality ratio and unmet need in family planning. This evaluation will also serve to enhance accountability, facilitate learning, and inform the development of the subsequent country programme. Furthermore, UNFPA will contribute financial and technical resources to the UNSDCF evaluation, managed by the Resident Coordinator's Office, to assess UNFPA's contributions to achieving the objectives of the UNSDCF and the 2030 Agenda. Given that the UNFPA 4th cycle CP was evaluated in 2019 the 5th cycle of 2021-2025 was not evaluated and thus the 6th CP 2026-2030 will be evaluated in 2029. There are no other resource-funded projects which have an evaluation commitment planned for the 6th programme cycle.</p> <p>In this CP cycle, UNFPA will continue to prioritize technical assistance for national research on core mandate areas, such as maternal health and GBV, to facilitate evidence-based policy and programming. UNFPA will continue updating the evaluative evidence matrix developed to inform the country programme document, including relevant findings and recommendations extracted from centralized evaluations, project evaluations, needs assessment and other relevant studies focusing on the outputs of the 6th CP.</p>
