

## COMMENTS ON THE UNFPA DRAFT COUNTRY PROGRAMME DOCUMENT FOR TURKIYE

*Second regular session 2025*

Comments by Germany	UNFPA country/regional office response to comments
Germany welcomes UNFPA's efforts to support Turkey to achieve a demographic dividend and manage its demographic transition through evidence- and human rights-based policies. While Turkey has surpassed the SDG target for maternal mortality, and has achieved UHC, access to SRH services is still inequitable. Germany appreciates UNFPA's efforts to expand access to services also for marginalized groups of people, including migrants and refugees. Furthermore, the planned adolescent health component will support greater reproductive agency of young people and contribute to realizing reproductive rights.	UNFPA thanks Germany for the comments pertaining to the focus of the CPD and looks forward to strengthening collaboration through the new CPD for strong results in the areas mentioned.
